WORK EXPERIENCE

XM

Athens, Attiki (Remote)

Software Engineer

Nov 2025 - Present

- Developed and maintained scalable React applications, building reusable components, managing state, and implementing modern hooks-based architecture to deliver responsive user interfaces.
- Integrated RESTful APIs and backend endpoints into the frontend, handling asynchronous data flows, error states, and data transformations to ensure seamless communication between UI and services.
- Collaborated in agile development environments, performing code reviews, debugging production issues, optimizing performance, and contributing to clean, maintainable frontend architecture.

Lateralus Ventures

Athens, Attiki (Remote)

Software Engineer

Apr 2025 - Dec 2025

- Built AI-powered web apps using React/Tailwind CSS, integrating LLMs (OpenAI, Claude, Lovable) for features like dynamic chatbots, document analysis, and text generation.
- Developed and integrated RESTful and GraphQL APIs, collaborating with backend services to handle data processing, authentication, and deployment, ensuring seamless interaction between front-end applications and cloud-based infrastructures.
- Designed state machines (XState) to manage complex UI flows (multi-step forms, real-time dashboards), reducing bugs in critical user journeys.
- Optimized LLM API calls with prompt engineering and caching, cutting latency while maintaining cost efficiency.

Epignosis learning technologies

Athens, Attiki (Remote)

Frontend Developer

Nov 2022 - Apr 2024

- Improved user experience by implementing responsive design practices, resulting in a decrease in bounce rate and an increase in average session duration.
- Collaborated with cross-functional teams to troubleshoot and resolve technical issues, reducing customer support tickets and increasing overall customer satisfaction ratings.
- Developed new features and functionalities for the SaaS platform, leading to an increase in user engagement and a growth in active users.

University of Crete

Heraklion, Crete

Teacher Assistant & Researcher

Feb 2021 - Mar 2024

- Conducted research on knowledge graphs (KG) and SPARQL, designing semantic data models and advanced query mechanisms to enable efficient information retrieval, which culminated in a master's thesis and peer-reviewed publication.
- Implemented interactive workshops based on teacher's lesson plans to engage students in hands-on learning experiences, resulting in an increase in student participation and understanding of Java programming concepts.
- Created and developed challenging coding projects and exercises in Java language to enhance students' problem-solving skills, leading to an improvement in student retention of coding principles.
- Collaborated with lead teacher to assess student progress and adjust workshop content accordingly, resulting in an increase in student success rates on coding assignments.

Conveos

Heraklion, Crete (Remote)

Frontend Developer

Jul 2021 - Nov 2022

- Developed and executed strategies to optimize user experience on 3 frontend projects in React, resulting in an increase in user engagement metrics.
- Collaborated with cross-functional teams to implement responsive design best practices, leading to a decrease in bounce rate across all projects.
- Utilized web component technology to create a reusable component library for future projects, streamlining development time.

Net Computer Center

Chania, Crete

Computer Technician

Jun 2015 - Aug 2015

- Performed routine maintenance and troubleshooting on 50+ computers and laptops daily, resulting in a decrease in system downtime for clients.
- Increased customer satisfaction through providing exceptional technical support and guidance to clients on the best device options for their needs.
- Utilized strong sales skills to sell new devices, gadgets, and computers to clients monthly, exceeding sales targets.

EDUCATION

University of Crete

Heraklion, Crete

MSc Computer Science - Information Retrieval

Graduation Date: Mar 2024

University of Crete

Heraklion, Crete

BSc Computer Science

Graduation Date: Mar 2021

CONSCRIPTION

Hellenic Air Force

Meteorologist

May 2024 - Apr 2025

PROJECT EXPERIENCE

Personal Project

Chania, Crete

My Portfolio

Aug 2024 - Oct 2024

- Used **ReactJS** to create a visually engaging and interactive user interface that highlights my front-end skills.
- Included sections for my projects, skills, and contact information, using components and hooks to ensure a smooth, responsive experience that reflects my expertise in modern web development.
- Set up a **CI/CD** pipeline using **GitHub Actions** to automate testing, building, and deploying updates to my portfolio.

University of Crete

Heraklion, Crete

Master's Thesis - KG-enriched File Explorer

Sep 2023 - Feb 2024

- Used a knowledge graph database to store and query semantic relationships between files.
- Built an intuitive user interface that leverages the knowledge graph to enable advanced search and filtering options.
- Set up a mechanism to detect changes in files and dynamically update the knowledge graph.

Bachelor's Thesis - Crowdsourcing Web platform

Dec 2019 - Jul 2020

- Designed game-like elements such as points, badges, and leaderboards to encourage users to participate actively in reporting and categorizing offensive behaviors.
- Developed a structured approach for collecting reports on offensive behavior, including categories and severity levels.
- Ensured user anonymity to encourage honest reporting without fear of exposure, implementing privacy safeguards that protected user identity.

SKILLS & GENERAL DETAILS

Skills: ReactJS, NextJS, JavaScript, TypeScript, HTML/CSS, Tailwind, Node.js, Git, CI/CD, Docker, Angular, WordPress, Kubernetes, Java, C++, C, SQL

Languages: Greek, English

Nationalities: Greek, American
